Instructions to download, install, and configure VPN

Download Global Protect VPN installer from the below link:

- VPN: https://drop.htcloud.ca/portal/s/4940720181005961573.msi

INSTALLATION AND CONFIGURATION FOR VPN:

1. After downloading the VPN installer from above link, run it as admin.
2. Follow the onscreen instructions to install it normally and no changes needed while installing VPN (Keep everything default).
3. After installation is completed, you can find Global Protect VPN in the service tray. Below image shows the icon in service tray.

   

   OR

   You can find the app in start menu by searching for “Global Protect”
4. Launch VPN and you will see a small window on the bottom right corner with VPN portal to login. For initial setup click on “Get Started” and enter “external.apialarm.com” in the field where is asks for IP address or URL and click connect.

5. On the next screen enter username and password for the user as provided. Username for all the users will be “First part of their email before @ Sign (Usually FirstName.LastName)” and Password will be set as provided and click connect

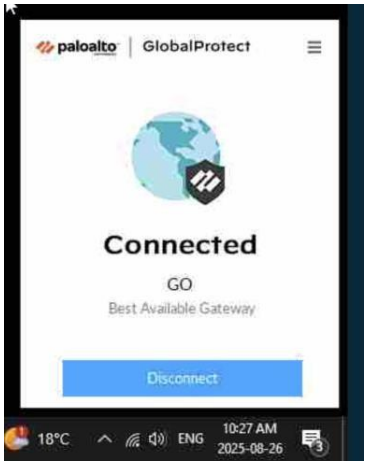

6. Next screen will take users to authenticate using MFA. Users will see a prompt stating “Enter a passcode or select one of the following options”. **All the users will be required to enter “1 or the option number corresponding to SMS Passcode to xxxxxx-xxxx”** in the “Verification Code” field and click on “Verify”

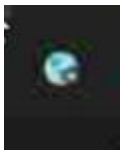

7. After clicking on Verify in the previous step, users will receive a text message with a OTP (One Time Passcode).
8. Users will see the same screen as shown in Step 6 again and will be required to enter the OTP received in Step 7 in “Verification Code” field and click “Verify”

9. Once the OTP is entered and verified. Global Protect will show “Connected” screen stating the VPN connection is successful.

You can also confirm the VPN status connected by seeing the VPN icon in service tray. It will turn from Grey (as shown in Step 3) to Blue/Green as the image below.

10. VPN is now connected and ready to go!
